

# Flags of all nations

## Key point

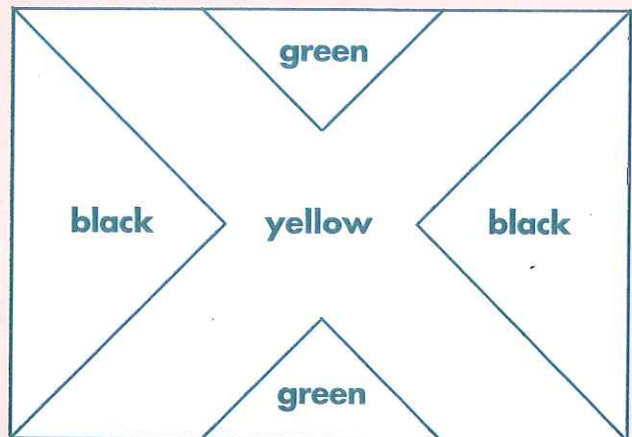

Children need a lot of practice in using rulers to draw accurately. This activity will help them to draw straight lines.

## Now work with your child

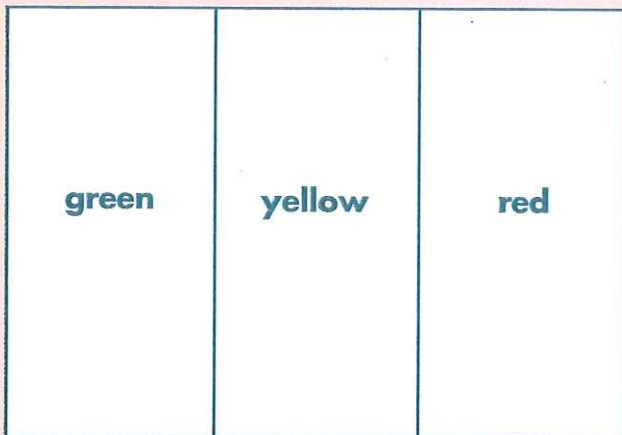

Look at these flags together.

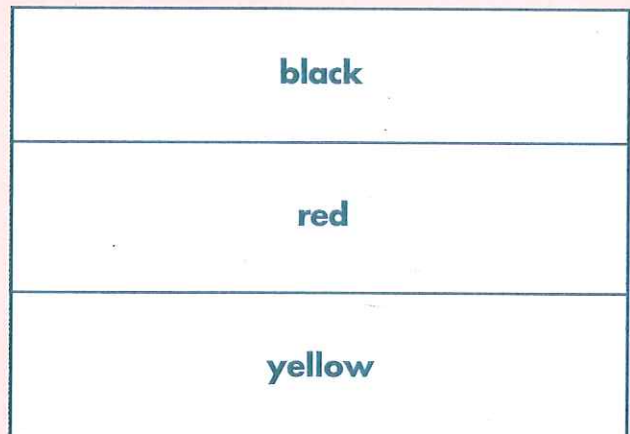

Switzerland

Jamaica

Mali

Germany

Now design some flags of your own. You could make one for each member of your family or for a pretend country. Or you could copy a real flag. If you do not have a ruler, use a straight-edged piece of card.

Where will your flag fly? On a building, in the garden or on a ship?

**Skills used:** looking, drawing straight lines, pencil control, research skills.
